

The Aurora NIR is now available from RCI Engineering.

Intended Use:

The Aurora NIR is a portable, handheld NIR Analyzer for Nutritionists, Veterinarians, Herdsmen and Livestock Professionals. The device provides quick and accurate analysis of corn silage, alfalfa haylage, TMR, and other feedstuffs.

Product Highlights:

- Handheld device with convenient carry case
- Features Bluetooth, USB, WiFi and Ethernet Connectivity
- Apps available for wireless data transmission to your smartphone for ease of sending data
- Standard calibrations included for basic feedstuffs.
- TMR Box is included for proper analysis of TMR due to particle separation during handling.
- Spare battery and charger is included.
- Battery conditioner is included.
- Bluetooth Keyboard and Mouse are included for ease of use by those who prefer traditional input methods.
- Unit is very easy to use and screen prompts direct proper operation.
- Long battery life – up to 2 hours of use per battery
- Quick exchangeable battery when battery expires
- Reliable analytical results
- Custom analytical reports and data storage
- Low maintenance costs compared to other NIR devices

Product Limitations:

- Additional calibrations can be created for other feedstocks not listed. Contact RCI for more information.
- Unit may not be mounted on any harvesting machinery. It is designed for handheld use only.
- Unit is water resistant, but is not water proof. It may not be submerged in liquid.

RCI Engineering LLC reserves the right to make improvements in design and changes in specifications at any time without notice and without incurring any obligation to install them on units previously manufactured or sold. Specifications, descriptions, and illustrative material herein are as accurate as known at time of publication, but are subject to change without notice. All parts, service and warranty matters are handled by RCI Engineering. Warranty for this device is 1 year as outlined in the RCI Engineering Warranty Statement.
