

Tandem Axle Bundle for John Deere Pull-Type Forage Harvesters Marketing Bulletin

8 January 2017

A Tandem Axle Bundle is now available from RCI Engineering for John Deere 3955 and 3975 Pull-Type Forage Harvesters.

Two bundles are available from RCI for Tandem Axles with the following specifications:

- Bundle RC0284 is supplied with two (2) 31.5-15 Tires and Wheels.
- Bundle RC0285 is supplied with two (2) 11L-14 Tires and Wheels.
- Bundle RC004001 is for the RH Side Only and supplied with one (1) 31.5-15 Tire and Wheel.
- Bundles without wheels and tires are available upon request.

Notes:

- Only heavy-duty wheel spacers may be used with this bundle.
- At least one 6" heavy-duty wheel spacer must be used on the RH side of all machines. Machines with Kernel Processors will need to replace the spacer with a 13" spacer.
- Tire spacing will be increased by approximately 4" on each side and can be partially corrected with wheel spacers and rim arrangements.
- This bundle is not compatible with the 2 Row-Narrow Crop Harvesting unit (tires extend past end of outer row) but is compatible with all other John Deere and RCI row unit and hay pickup attachments.

Setup Time:

Approximately 5 hour of installation and setup time is required due to additional frame reinforcements that need to be installed.

Warranty:

Standard 1 (one) year warranty on all new units from date of sale. All parts, service and warranty matters are handled by RCI Engineering.

RCI Engineering reserves the right to make improvements in design and changes in specifications at any time without notice and without incurring any obligation to install them on units previously manufactured or sold. Specifications, descriptions, and illustrative material herein are as accurate as known at time of publication, but are subject to change without notice.
